

# Micronized Barley

High quality Micronized Flaked Barley. Optimisation of starch gelatinisation improves digestible energy of barley across species.

All species benefit from increased productivity - improved growth and production and improved feed conversion. Micronized barley has special implications where small intestine amylase production is low (young livestock, companion animals, horses) and where hind gut production of short chain fatty acids are undesirable.

Suitable for all diets where barley is normally included. Recommended for high performance diets and young animal diets. Suitable for horses.

## Typical Analysis

Fresh Weight (%)	
Dry Matter	86
Moisture	14
Protein	10.5
Oil	3
Fibre	4.5
Ash	2.2

Energy Levels (MJ/Kg)	
Ruminant (ME)	12
Poultry (ME)	12.5
Pig (DE)	13.5

## Suitable For

Cattle, Sheep, Pig, Equine, Dog, Small Pet, Wild Bird

## Available Formats

Flaked, Ground, Blend, Whole

## Packaging

25kg bag  
I.B.C. Tote 500kg - 1,000kg  
Bulk: Blown or Tipped
