

Micronized Full Fat Soya

High quality Micronized Full Fat Soya Beans manufactured from only the best grade Canadian soybeans. Micronization optimises protein solubility, oil availability and reduction of anti-nutritional factors.

Provides high quality by-pass protein and oil, whilst maintaining ileal digestibility levels; with good amino acid profile and high in EFA. Reduced levels of TIA and urease activity ensuring optimum nutrient uptake. Manipulation of the micronizing process allows for differing requirements between ruminants and non ruminants.

Masham Micronized Soya is less oily in texture than other full fat soya forms and has improved flowing characteristics with the result of less bridging in bins.

Typical Analysis

Fresh Weight (%)	
Dry Matter	86
Moisture	14
Protein	36
Oil	19
Fibre	8
Ash	5.1

Energy Levels (MJ/Kg)	
Ruminant (ME)	16
Poultry (ME)	15
Pig (DE)	18

NOTE: Whilst every effort is made to ensure the accuracy of this document, the information provided is meant as a guideline only.

Suitable For

Cattle, Sheep, Pig, Equine, Dog, Small Pet, Wild Bird, Poultry

Available Formats

Flaked, Ground, Blend

Packaging

25kg bag
I.B.C. Tote 500kg - 1,000kg
Bulk: Blown or Tipped
